

Upholstery weight fabrics in the United States have a width of 54 inches (140 cm). Allowance is made for matching but some stripe, plaid and patterns with large repeats may require more fabric. Additional fabric is needed for arm covers, self lined skirts and attached pillow backs.

1 inch=2.54 centimeters \*1 foot (12 inches) =.305meter \*1 yard (36 inches) =0.914 meters
